

ImPlot::LineStripRenderer
::operator()

ImPlot::LineSegmentsRenderer
::operator()

ImPlot::PrimLine

```
graph LR; A[ImPlot::LineStripRenderer::operator()] --> C[ImPlot::PrimLine]; B[ImPlot::LineSegmentsRenderer::operator()] --> C;
```

The diagram illustrates a common output for two different rendering functions. On the left, there are two white rectangular boxes. The top box contains the text 'ImPlot::LineStripRenderer' followed by '::operator()' on a new line. The bottom box contains 'ImPlot::LineSegmentsRenderer' followed by '::operator()' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text 'ImPlot::PrimLine'.
