

ImGuizmo::matrix\_t  
::operator\*

ImGuizmo::matrix\_t  
::operator\*=

ImGuizmo::matrix\_t  
::Multiply

```
graph LR; A[ImGuizmo::matrix_t::operator*] --> C[ImGuizmo::matrix_t::Multiply]; B[ImGuizmo::matrix_t::operator*=] --> C;
```

The diagram illustrates the relationship between two operator functions and a matrix multiplication function. On the left, there are two white boxes with black borders. The top box contains the text 'ImGuizmo::matrix\_t::operator\*' and the bottom box contains 'ImGuizmo::matrix\_t::operator\*='. Two blue arrows originate from the right side of these boxes and point towards a single gray box on the right. This gray box contains the text 'ImGuizmo::matrix\_t::Multiply'. The arrows indicate that both operators are implemented by or delegate to the 'Multiply' function.
