

ImPlot::ShowStyleEditor

```
graph LR; A[ImPlot::ShowStyleEditor] --> B[ImPlot::ShowStyleSelector]; B --> C[ImPlot::StyleColorsDark];
```

The diagram illustrates a three-step process for configuring ImPlot styles. It begins with 'ImPlot::ShowStyleEditor', which leads to 'ImPlot::ShowStyleSelector', and finally to 'ImPlot::StyleColorsDark'. The first two steps are represented by white boxes, while the final step is a dark gray box, indicating the final state or output of the process.

ImPlot::ShowStyleSelector
